- Unlimited live viewing via Wi-Fi/3G/4G LTE
- Extra wide angle lens to let you see more
- InSightHD app available on Apple store and Google Play
- Night vision mode for viewing in the dark

Alerts & notifications for ultimate peace of mind

- Phone receives notification when motion/sound is detected
- Push to talk via smartphone/tablet
- Share monitors with other smartphone/tablet users
- Optional cloud video recording when sound/motion is detected

Easy, safe and secure

- Easy set-up of monitor via QR code
- Video encrypted for secure connection
- Powered by iVideon, a leading firm in video cloud solutions

PHILIPS

Highlights

Wi-Fi enabled

The In.Sight wireless monitor is a Wi-Fi enabled monitor, it uses your home wireless network to stream live video and audio to your smartphone/tablet. A home monitor that you can set up anywhere you like.

Night vision mode

Infrared night vision mode allows you to watch your home even in the dark. When it's dark, infrared light goes on for the monitor to capture clear black and white video. Night vision mode switches on and off automatically, or you can adjust it manually.

Extra-wide angle lens

Philips In.Sight wireless HD home monitor M120, boasts a viewing angle of 102 degrees that shows you more of the room at once, letting you see a lot more than other monitors.

Easy set-up via QR code

Set-up is simple with the In.Sight+ app. The app will generate a QR code for your home Wi-Fi settings. With the QR code, the monitor will automatically pair with your Wi-Fi network, easily and instantly.

Motion/sound notifications

It's impossible to predict when something might happen. In.Sight keeps watching with adjustable motion and sound detection. You will be notified automatically when sound or motion is detected.

Push to talk

With the In.Sight monitor, not only can you keep an eye on your home, but also talk to your loved ones. Simply press "talk" on your smartphone/tablet and communicate at once. What a great way to say hello!

Share with others

Allow your family and friends to view your monitors and let them watch your home for you. The In.Sight+ app lets you share each monitor with other users so that they have access to live video.
